Why use Velvet Antler:

It is the optimum natural dietary supplement with health enhancing properties.

- Combats fatigue and ill effects of stress.
- Increases production of white blood cells.
- Builds a powerful immune system.
- Proven faster recovery from physical exertion and injury.
- Higher energy levels.
- Increases muscular strength, endurance and lean body mass.
- Look and feel younger.
- More youthful skin and hair.
- Provides nutritional support for bone and joint structure and function.
- Natural source of IGF-1 and growth hormones.

Why Import From New Zealand:

Directly imported from New Zealand where the pure air, water and soil produce this extraordinary and potent Velvet Antler. Their antlers are removed when half grown by methods approved by the Animal Welfare Council. Using

government regulated procedures the antlers are processed ensuring cleanliness and potency. There are no cases of wasting disease in New Zealand and our Velvet Antler is standardized so the deer velvet antler that you get today will be the same a year from now.

Ingredients:

Containing all the minerals and nutrients essential for maintaining a healthy body. Deer Antler Velvet is the superior natural source for growth factor hormones IGF-1, IGF-2, amino acids, prostaglandin, glucosamine, chondroitin, collagen and contains the trace minerals iron, zinc, copper, manganese and selenium as well as calcium, magnesium, potassium, sodium, sulfur and phosphorus.

Immune Support:

Deer Antler Velvet has been shown to stimulate the immune system, which is the body's main line of defense against infection and disease. The immunostimulatory ability of velvet antler means it can help combat disease by improving the ability of the immune system to react to a challenge from a pathogen.

Bone and Joint Support:

Velvet Antler provides nutritional support for bone and joint structure and function. Velvet Antler contains anti-inflammatory agents like glucosamine sulfate, chondroitin sulfate, type 11 collagen, which may assist in reducing pain and inflammation of a variety of degenerative diseases. Velvet antler assists in wound healing and enhances bone fracture healing.

Cardiovascular Health:

Velvet Antler increases both volume and the circulation of blood through the body which increases vitality and energy. It also has the ability to provide bioavailable Iron, which can normalize blood cell counts in anemic patients and also result in increased energy and well being.

Sports Recovery and Performance:

Athletes world wide use Velvet Antler to promote endurance, stamina and strength.

Athletes should expect more muscle-cell growth and a greater uptake of glucose and amino acids into muscle cells. Studies show Velvet Antler to help increase strength and endurance. Athletes see faster recovery time between workouts and increased energy levels.
